

SUMMARY OF REQUEST FOR ALTERATION

PROPONENT: CHRISTOPHER JARVIS
PROPOSAL NAME: INMETAL NORTH AMERICA LTD.
CLASS OF DEVELOPMENT: CLASS 1
TYPE OF DEVELOPMENT: FOUNDRY
CLIENT FILE NO: 4371.00
CURRENT LICENCE NO: 2359 S2

OVERVIEW:

A proposal dated August 28, 1998, was received from Mr. Christopher Jarvis on behalf of InMetal North America Ltd. on September 2, 1998, for the construction and operation of a foundry facility located at the junction of Highway 3 and Miller Road, ¼ mile west of the community of Pierson at NE ¼ 34-2-29 in the Rural Municipality of Edward. The development involves the casting of steel and alloy products through the lost foam manufacturing process. There is potential for air borne emissions and noise. Plant operation is based on one 8 hour shift, five to six days per week. A second or third shift may eventually be added. The proponent requested an immediate approval for construction only due to the approach of the end of the building season. An Environment Act Licence 2359 S1 was issued on September 21, 1998, for the construction only of the Development. An Environment Act Licence 2359 S2 was issued on October 28, 1998.

On December 7, 1998, the proponent submitted a proposal for alteration of the Development. The alteration involved the connection of the Development to the local municipal sewer system for the sanitary and process wastewaters and the deletion of the septic system from the original proposal. In addition, a process water cooling tower was to be installed to minimize the generation of process wastewater. This proposal has received the approval of the Regional office.

RECOMMENDATIONS:

An alteration to Licence 2359 S2, considering the above facts, be prepared and issued. Licence 2359 S2 be rescinded. Responsibility for enforcement of the Licence may be transferred to the Region upon completion of the facility.
