

Licence No.: 2501

Licence Issued: March 19, 2001

**IN ACCORDANCE WITH THE MANITOBA ENVIRONMENT ACT (C.C.S.M. c. E125)
THIS LICENCE IS ISSUED PURSUANT TO SECTION 10(1) TO:**

TOWN OF STE. ROSE DU LAC; "the Licencee"

for the construction and operation of the Development being a water treatment plant and associated facilities located in SE 8-24-15W in the Town of Ste. Rose du Lac, in accordance with the Proposal filed under The Environment Act dated July 7, 2000 and subject to the following specifications, limits, terms and conditions:

DEFINITIONS

In this Licence,

"accredited laboratory" means any facility accredited by the Standard Council of Canada (SCC), or facilities accredited by another accrediting agency recognized by Manitoba Conservation to be equivalent to the SCC, or facilities which can demonstrate to Manitoba Conservation, upon request, that quality assurance/quality control (QA/QC) procedures are in place equivalent to accreditation based on the Canadian Standard Can/CSA-Z753, extension of the international standard ISO 9000, Guide 25.

GENERAL TERMS AND CONDITIONS

This Section of the Licence contains requirements intended to provide guidance to the Licencee in implementing practices to ensure that the environment is maintained in such a manner as to sustain a high quality of life, including social and economic development, recreation and leisure for present and future Manitobans.

1. The Licencee shall, in addition to any of the following specifications, limits, terms and conditions specified in this Licence, upon the request of the Director:
 - a. sample, monitor, analyse or investigate specific areas of concern regarding any segment, component or aspect of pollutant storage, containment, treatment, handling, disposal or emission systems, for such duration and at such frequencies as may be specified;
 - b. determine the environmental impact associated with the release of any pollutants from the said plant;
 - c. conduct specific investigations in response to the data gathered during environmental monitoring programs; or
 - d. provide the Director, within such time as may be specified, with such reports, drawings, specifications, analytical data, flow rate measurements and such other information as may from time to time be requested.
2. The Licencee shall, prior to the construction and commencement of operation of the Development, receive approval pursuant to The Public Health Act for final plans for the Development.
3. The Licencee shall ensure that the design, construction and operation of the municipal water supply is in accordance with Manitoba Regulations under The Public Health Act and all operating requirements as recommended by Manitoba Conservation.
4. The Licencee shall ensure that the operation of the Development is carried out by individuals properly trained or qualified to do so.
5. The Licencee shall ensure that all used oil products and other regulated hazardous wastes generated by the machinery used in the construction and operation of the Development are collected and disposed of in

accordance with applicable Manitoba Conservation and legislation requirements.

6. The Licencee shall revegetate soil exposed during the construction of the Development with native or introduced grasses or legumes. Native species shall be used to revegetate areas where native species existed prior to construction.

SPECIFICATIONS, LIMITS, TERMS AND CONDITIONS

7. The Licencee shall notify the Park-West Region of Manitoba Conservation not less than two weeks prior to beginning construction of the Development. The notification shall include the intended starting date of construction and the name of the contractor responsible for the construction.
8. The Licencee shall ensure that non-reusable demolition and construction debris from the Development is disposed of at a waste disposal ground operating under the authority of a permit issued under ***Manitoba Regulation 150/91*** respecting ***Waste Disposal Grounds***.
9. The Licencee shall ensure that fuel storage and equipment servicing areas established for the construction and operation of the Development are located a minimum distance of 100 metres from any waterbody, and shall comply with the requirements of ***Manitoba Regulation 97/88R*** respecting ***Storage and Handling of Gasoline and Associated Products***.
10. The Licencee shall conduct an effluent monitoring program as described in Clauses 11 to 14, of this Licence, for a period of two years commencing with the operation of the Development. Following this period, the duration of the monitoring program may be extended by the Director if the results, in the opinion of the Director, indicate that a longer monitoring period is appropriate.
11. The Licencee shall, on a quarterly basis for the duration of the effluent monitoring program, collect grab samples at three locations approved by the Director. These locations shall be in the backwash effluent stream inside the water treatment plant and in the Turtle River above and below the effluent discharge point.
12. The Licencee shall transport the grab samples collected pursuant to Clause 11, of this Licence, to an accredited laboratory for analysis. The samples shall be stored and transported in accordance with procedures specified by Manitoba Conservation to ensure that the samples are suitable for analysis.
13. The Licencee shall, at an accredited laboratory, have the samples collected pursuant to Clause 11, of this Licence, analysed for the following parameters:
 - a. pH;
 - b. conductivity;
 - c. total dissolved solids;
 - d. total suspended solids;
 - e. total alkalinity;
 - f. iron;
 - g. magnesium; and
 - h. manganese.
14. The Licencee shall, not more than 30 days after the results of each quarterly analysis are available, submit the results to the Director.
15. The Licencee shall:
 - a. each winter during the operation of the Development, monitor ice accumulation in the Turtle River downstream of the effluent discharge point; and
 - b. remove or break accumulated ice deposits resulting from the operation of the Development, or take

other reasonable action as may be necessary, to prevent flooding due to ice accumulation from the operation of the Development on land downstream of the effluent discharge point which is not controlled by the Licencee.

16. The Licencee shall, during winter months, ensure that signs are placed as necessary in the vicinity of the effluent discharge point in the Turtle River advising of potentially dangerous ice conditions.

REVIEW AND REVOCATION

- A. If, in the opinion of the Director, the Licencee has exceeded or is exceeding or has or is failing to meet the specifications, limits, terms, or conditions set out in this Licence, the Director may, temporarily or permanently, revoke this Licence.
- B. If construction of the development has not commenced within three years of the date of this Licence, the Licence is revoked.
- C. If, in the opinion of the Director, new evidence warrants a change in the specifications, limits, terms or conditions of this Licence, the Director may require the filing of a new proposal pursuant to Section 10 of The Environment Act.
