**RE: COMPLIANCE PLAN EXTENSION – CITY OF WINNIPEG SOUTH END SEWAGE
TREATMENT PLANT (SEWPCC)
ENVIRONMENT ACT LICENCE NO. 2716 RR**

As of September 2024, SEWPCC is in compliance for all effluent requirements in the licence (clause 28) under all flow conditions, including biological phosphorus removal. However, final project completion is still outstanding. As a result, the City is requesting an extension to the SEWPCC compliance plan to December 31, 2025. This will allow the completion of plant-wide construction and commissioning (clause 14) and provision of drawings (clause 21).

The City and Contractor will continue to work towards completion and final commissioning of SEWPCC. Updates will be provided in the monthly SEWPCC Biological Nutrient Removal and Upgrade progress reports.

Should you wish to discuss this information in more detail, we would be pleased to meet with your team. If you have any questions about this letter, please contact me at 204-986-5210 or by email at cwiebe@winnipeg.ca.

Sincerely,

Cynthia Wiebe, P. Eng., CAMP
Manager of Engineering Services
