Attention: Tracey Braun, M.Sc., Director

Dear Ms. Braun:

RE: Request for Alteration to Environment Act Licence No. 2716RR

This is in response to your letter dated October 1, 2015 requesting a date by which the biological nutrient removal facilities will be constructed and commissioned.

As indicated, it is anticipated that Licence compliance will be achieved with chemical addition July 31, 2018. Additional construction activities will be necessary to modify and repurpose existing plant facilities so that biological nutrient removal can be implemented. It is anticipated that this work may be completed by July 31, 2019. This schedule is aggressive. The completion date for the project and the dates for licence compliance will be reviewed and subject to change as the design progresses and the construction contract packages are implemented. Construction progress updates will continue to be provided every 6 months according to Clause 14a of the Licence.

Should you have any questions please contact Duane Griffin at 204-986-4483.

Yours truly,

Chris Carroll, P.Eng., MBA
Manager of Wastewater Services
