Attention: Gilles Gauthier

RE: Notice to the Minister under the *Navigation Protection Act* for Approval of the Breakwater and Marina, located on Lac Du Bonnet, at 50° 22' 26"N x 095° 51' 33"W, Winnipeg River, in the Province of Manitoba

Enclosed please find the Approval for the above-noted work issued by the Minister of Transport in accordance with the *Navigation Protection Act* (NPA), subsection 6(8) – Approval after Construction or Placement begins.

Please note that the attached document relates only to the effect of your work on navigation under the NPA. It is the owner's responsibility to comply with any other applicable laws and regulations.

On completion of installation of the new private aid to navigation marking the breakwater, please contact the Supervisor, Marine Aids Program, Mr. Francois Lamay as per the attached letter Re; marking directions. This will ensure the correction of **marine chart 6205** and publications.

Should you have any questions, please do not hesitate to contact our office in Edmonton by phone at (780) 495-8215, by fax at (780) 495-8607 or by e-mail at NPPPNR-PPNRPN@tc.gc.ca.

Respectfully,

Inga Thorsteinson

WORK: Breakwater and Marina

SITE LOCATION: Located at Approximately 50° 22' 26"N x 095° 51' 33"W,
Lac Du Bonnet, Winnipeg River, in the Province of Manitoba

Regarding the Notice and application (detailed above) to the Minister of Transport, submitted pursuant to the *Navigation Protection Act*, for an approval of the work per the attached plans, the Minister hereby approves the work pursuant to subsection 6(8) Approval after construction or placement begins, in accordance with the following terms and conditions:

1. A port hand (green) buoy with a green light shall be placed and maintained at the seaward end of the breakwater.
2. The green light shall have a minimum night time nominal range of 2 (two) nautical miles and display a characteristic of FL 4s. (as per the attached letter from CCG Marine Aids Program).
3. The crest elevation of the breakwater shall be maintained at 1 (one) meter above the Full Service Level 254.8 meters (as regulated by McArthur Generating Station for Lac Du Bonnet).
4. It is the proponent's responsibility to remove all portions of the breakwater from the limits of the waterway prior to abandoning the works.
5. Any proposed changes shall be reviewed and accepted by the Navigation Protection Program prior to implementation of the same.

SIGNED in two copies on JAN 13 2016 in Winnipeg, Manitoba

Re: Granite Hills Golf Course & Estates – Boat Docking's Breakwater - Winnipeg River

In regards to the above referral, we make the following recommendation:

- That the end of the breakwater be marked with a green spar light buoy. The green light shall have a minimum night time nominal range of 2 nautical mile and display a characteristic of Fl 4s.

Please have the applicants contact this office when the installation is complete. This will enable us to advise Canadian Hydrographic Service about the changes.
