Re: Notice of Alteration – Grosse Isle, MB – License 1855 RRRR

Dear Krystal,

Further to the notice of alteration submitted to your attention on November 6, 2014, this letter is to request constructional approval for the Crop Production Services (Canada) Inc. Grosse Isle, Manitoba facility, located on the SE ¼ of 32-12-1 WPM in the Rural Municipality of Rosser.

This application includes:

- A hard copy of the new license proposal, and
- CPS site plan drawing.

The target date of construction for this project is November 20, 2015. Please contact me to indicate if you will not be able to review and approve this application in time for this deadline.

If you have any questions regarding this notice of alteration request please direct any questions to myself.

Sincerely,

Randi Cyr
Manager, Operations Compliance
Crop Production Services (Canada) Inc.

Crop Production Services (Canada) Inc.
Grosse Isle, MB

Site Information

This property is located on the SE ¼ of 32-12-1 WPM in the Rural Municipality of Rosser and is currently owned by Crop Production Services (Canada) Inc (CPSC). A copy of the land title was included with the notice of alteration that was submitted on November 6, 2014.

Changes Within the Development

This Notice of Alteration is to request constructional approval to perform a number of upgrades to the site to increase capacity. The site currently includes four 200 tonne metal and two 90 tonne metal which totals to a maximum capacity of 980 tonne of various bulk liquid fertilizers. All tanks are located within one secondary containment berm.

At this time, CPSC would like to notify Manitoba Conservation that it intends to add one 200 tonne metal tank and one 200 fiberglass tank.

The current plans are for construction to commence on November 20, 2015.

Maps, Drawings, Site Plans, etc.

A site plan showing the additions and deletions in red has been attached for Manitoba Conservation's files.

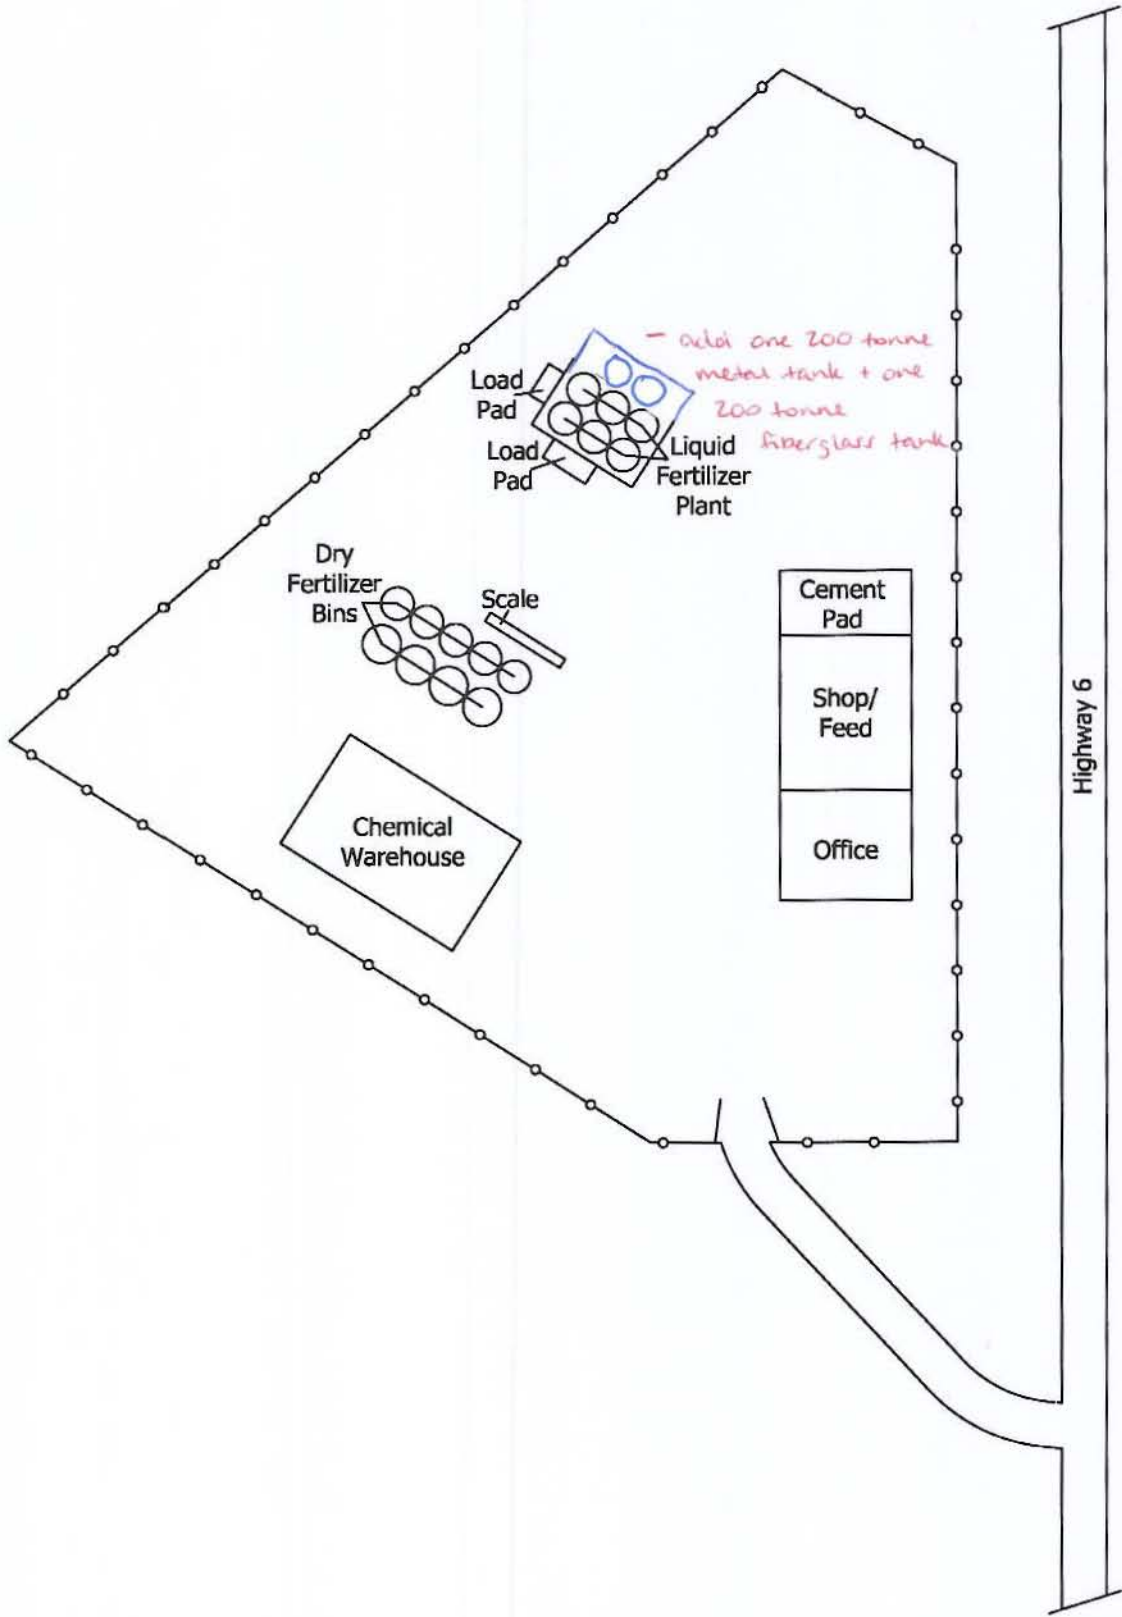

Identification and Quantification of Changes to the Type or Quantity of Raw Materials or Substances Used or Processed

Total available liquid fertilizer storage will increase from 980 tonne to 1,380 tonne.

Quantification of Change in the Environmental Effects as a Result of the Alteration

With the increase in capacity, no significant changes in the environmental effects are anticipated from the alteration of this development. The current containment berm was sized to contain a potential leak from the largest tank plus 25 percent.
