Subject: File No. 3851.00 _Waste Connections: Search Facility Area pad approval to use

Good afternoon Chris,

Thank you for your email dated November 18, 2024, requesting approval to use 60 mil HDPE lined portion of the search facility area pad located in Phase II of the Prairie Green Integrated Waste Management Facility.

Your email includes a QA/QC report dated November 15, 2024, which was prepared and submitted by Trek Geotechnical on behalf of Waste Connections of Canada Inc. This report details the panel layout, installation, and engineering oversight of the HDPE geomembrane liner for the search facility area pad. I have reviewed the report and confirmed that the requirements of condition 5 of the notice of alteration approval dated August 20, 2024, have been met.

As per condition 7 of the August 20, 2024 notice of alteration approval, I approve you to operate and use the HDPE liner of the search facility area pad following the specifications, limits, terms, and conditions outlined in the approval.

If you have any questions concerning this approval, please do not hesitate to contact me.

Thank you.

Regards,

Mehak Bajwa, P.Eng, M.Eng
