Eshetu,

My apologies for the late response. I thought that this email was long gone and somehow it ended up in my draft box.

In answering your questions, the RM will require an all weather road be built for access to the property. We will be moving the crusher from our Plessis site for which we have a license. The license number is 2915.

Thanks once again for your cooperation in this matter. If you require anything further please do not hesitate to contact me at your convenience.

Sincerely,

Tony Teixeira  
Vice President

**Importance:** High

Hello Tony,

Your request below has been forwarded to us for review. We considered your request as a Notice of Alteration. There please provide the following additional information.

1. When you say the construction of the all weather road is the project requirement, is it required by the RM or any other body?
2. Can you provide the information from where you are moving the crusher to the site. Does the crushing currently operating under a licence? If so please provide the licence number.

Regards

*Eshetu Beshada, PhD, PEng.  
Environmental Engineer*

**Subject:**

Nada,

As you are aware we have been issued an license to operate a concrete batch plant on our property in the RM of West St. Paul. The property is on the corner of Second St. and Emes Rd. also know as Lot 3 Plan 28571 WLTO in OTM Lots 1 and 2 Parish of Saint Paul.

We have begun construction of a building to house our shop and offices. In addition as part of this project we will be required to construct a suitable all weather road way on Emes Rd. which is currently just mud. In order to do this effectively and responsibly we wish to recycle the concrete stockpile that is currently on our property. We respectfully request permission move a crusher and conveyor onto the site for approximately 4 to 6 weeks in order to process the material and make it suitable to utilize for construction of said roadway. We would of course be mindful of our surroundings and incorporate all measures such as dust control. As you are aware this is an industrial zone and the nearest residents are safe distances away. Ideally we would like to commence this work as soon as possible weather permitting.

Thank you for your consideration regarding this matter. If you require any further information please do not hesitate to contact me on my cell at 204-798-1800.

Sincerely,

Tony Teixeira  
JMT Holdings Inc.
